

SCHEME OF THE MANEUVERS

MacArthur Announces Plan of Coming War Demonstrations. ILLUSTRATE REPULSE OF HOSTILE FLEET

Details Will Be Faithful to Actual Conditions and Mines, Signal Conventions and Balloons May Be Used.

NEW YORK, Aug. 25.—Major General MacArthur made public today the text of the rules agreed upon for the coming army and navy maneuvers.

NEW YORK, Aug. 25.—The navy will be divided into two distinct phases—period of preparation and period of hostilities.

On the part of the army the information to be gained relates to the general efficiency, down to the smallest detail, of all that appertains to the construction and armament of the land defenses and the training of the forces manning them.

Judges and Time. Umpires of both services will be detailed to all forts and ships and will report to a board of arbitration of five officers, whose judgment will be final.

Elaborate rules are laid down to estimate the value of the fire of guns of all caliber so as to determine when any ship or fort shall be considered to have been put out of action or silenced.

NEW LONDON, Conn., Aug. 25.—Conditions are exceedingly warlike in the forts of the New London district in preparation for the army and navy maneuvers which begin at midnight Friday and are to be carried out on the plans reported today by the respective departments.

Colonel Davis of Fort Trumble, the commanding officer of this district, is directing the movements of preparations, and in this is assisted by the signal corps under command of Captain Russell, and by Major Powell, who is in charge of this engineer district.

Five steamers are running continuously from this port to the island fortifications, bringing supplies and munitions of war. Detachments of troops are arriving daily.

Before the beginning of the maneuvers of the navy which terminated with the defeat of Pillsbury by Higginson, the ships of the North Atlantic squadron were frequent visitors in this vicinity.

Balloons Will Be Used. General Greeley of the signal corps has arrived here today and will command that branch of the service.

LESSON OF NAVAL MANEUVERS. Officers Well Pleas'd and Say More Difficult Problem Will Be Presented Next Time.

WASHINGTON, Aug. 25.—Admiral Higginson will soon submit to the navy department an elaborate report upon the results of the chase of the White squadron by the North Atlantic squadron, which ended yesterday.

For obvious reasons such parts of this report as may treat of any imperfections developed probably will be withheld from publication. In the meantime the official

report of the affair is confined to the brief telegram already published from Commander Pillsbury announcing his surrender and a dispatch from Admiral Higginson telling of the disposition he had made of the vessels engaged in the chase.

WAR VESSELS SAIL AWAY. No Ships to Be Seen on the Water Where the Recent Maneuvers Occurred.

ROCKPORT, Mass., Aug. 25.—There were no war vessels here today, nor could any be seen outside, where for several days last week Rear Admiral Higginson's squadron was stationed, guarding the coast.

With the termination of the naval maneuvers yesterday the vessels began to depart. This morning not one was left in these waters and the place had resumed the usual summer quiet.

STATISTICS OF ILLITERACY. Census Bureau Reports on Condition of Men of Voting Age in United States.

WASHINGTON, Aug. 25.—The census office today issued a preliminary report on illiteracy among men of voting age in city and country districts in the census year 1900.

In the United States as a whole, excluding Alaska and Hawaii, the male population at least 21 years of age and living in cities having at least 25,000 inhabitants, was 5,885,644, of which 339,233 or 5.76 per cent were illiterate.

These figures indicate that illiteracy among adult males is less than half as prevalent in the large cities as it is in the rest of the United States.

As a rule, a population living in large cities is likely to include a smaller proportion of illiterates than a population scattered over a sparsely settled area and more difficult to reach by an effective system of public schools.
