The following catalogue (written in the mountains) is based upon observations made in August, 1874, August, 1875, and June 22d to July 9th, 1877, especially about the Saint Regis Lakes, Mr. Minot having been with me, only during the last week of June. Each of us has used his initials in making a statement which the other has not verified.

The general features of the Adirondacks, in those parts which we have examined, are the many lakes, the absence of mountain-brooks, the luxuriant forest-growth (the taller deciduous trees often reaching the height of a hundred feet, and the White Pines even that of a hundred and thirty), the sandy soil, the cool, invigorating air, and both a decided wildness and levelness of country as compared with the diversity of the White Mountain region.

The avifauna is not so rich as that of the latter country, because wanting in certain "Alleghanian" birds found there, and also in species belonging especially to the Eastern or North-eastern Canadian fauna. Nests, moreover, seem to be more commonly inaccessible and rarely built beside roads or wood-paths, as they often are in the White Mountains.

The following other *Dendroeca* are summer-residents in the White Mountains: Prairie Warbler, accidental; the Chestnut-sided, Bay-breasted, Black-polled, and Pine Warblers, all rare (M.).

25. Canada "Flycatcher." *Myiobius Canadensis* (Linnaeus). Less common than in the White Mountains, where the Redstart also is found, even at Bethlehem (M.).

36. Red Crossbill. *Loxia curvirostra* (Linnaeus). Not rare. The male often sings somewhat like a Purple Finch from the top of a tall dead tree. The White-winged Crossbill we have not seen here.

42. Swamp Sparrow. *Melospiza palustris* (Wilson). Two or three were found in the wet ground, covered with very low shrubs, which borders the stream connecting Upper Saint Regis and Spitfire Lakes. Perhaps not found in the White Mountains (M.).

44. Field Sparrow. *Spizella pusilla* (Wilson).

46. Snow-bird. *Junco hyemalis* (Linnaeus). Common. Less so than in the White Mountains, at least than in the northern and western parts, where the Canadian fauna is most marked (M.). This opportunity is taken for mentioning that the Rose-breasted Grosbeak, *Cotispeza Ludovicana* (Linnaeus), was seen in July, 1875, on Mount Mansfield, Vt., and in July, 1877, in Essex County, New York (R.).

47. Bobolink. *Dolichonyx oryzivorus* (Linnaeus). Several seen, August, 1874 (R).

50. Rusty Blackbird. *Scolecophagus ferrugineus* (Gmelin). Two or three seen in June (M.).

52. Raven. *Corvus corax* (Linnaeus). A pair were observed at Lake Farnsly, Jr., August, 1874 (R).

64. Night "Hawk." *Chordelles Virginianus* (Gmelin).

67. Hummingbird. *Trochilus colubris* (Linnaeus). Rare; lives in the woods.
68. **Kingfisher.** *Ceryle alcyon* (Linnaeus).

69. **Cuckoo.** *Coccyx erythropthalmus* (Wilson)?. Twice heard.

70. **Pileated Woodpecker.** *Hylotomus pileatus* (Linnaeus). Rare; but found in the backwoods (R.).

71. **Hairy Woodpecker.** *Picus villosus* (Linnaeus). Very common; with a great variety of notes, some of which are indistinguishable from those of the *Picoides*.

72. **Downy Woodpecker.** *Picus pubescens* (Linnaeus). Once seen in June, and common in August (R.).

73. **Black-backed Woodpecker.** *Picoides arcticus* (Swainson). Common; second in numbers to the Hairy only.

74. **Banded-backed Woodpecker.** *Picoides Americanus* (Brehm). Much less common than the preceding.

75. **Yellow-bellied Woodpecker.** *Sphyrapicus varius* (Linnaeus). Quite common.

76. **Golden-winged Woodpecker.** *Colaptes auratus* (Linnaeus).

77. **Barred Owl.** *Syrnium nebulosum* (Forster). One shot in August, 1875 (R.). Probably not very rare.

78. **Great Horned Owl.** *Bubo Virginianus* (Gmelin). Common in wild parts (R.). There are doubtless other kinds of owls here as summer-residents.

80. **Cooper's Hawk.** *Nisus Cooperi* (Bonaparte).

81. **Sharp-shinned Hawk.** *Nisus fuscescens* (Gmelin). The Sparrow Hawk and the Red-shouldered Buzzard we have not seen here.

82. **Red-tailed Buzzard.** *Buteo borealis* (Gmelin).

83. **Broad-winged Buzzard.** *Buteo Pennsylvanicus* (Wilson). One shot August 24th, 1874 (R.).

84. **Bald Eagle.** *Haliaetus leucocephalus* (Linnaeus). Rare, but seen at least once (R.). The Golden Eagle probably occurs here.

85. **Fish Hawk.** *Pandion haliaetus* (Linnaeus). Rare, but certainly breeds here (R.).

86. **Wild Pigeon.** *Ectopistes migratorius* (Linnaeus). Undoubtedly to be found here at times.

87. **Canada Grouse.** *Tetrao Canadensis* (Linnaeus). In some parts quite plentiful (R.).

89. **Woodcock.** *Philohela minor* (Gmelin). In July, one was shot at Paul Smith's; none of the inhabitants knew what it was, or had ever seen another (R.).

90. **Spotted Sandpiper.** *Tringolides macularius* (Linnaeus).

91. **Great Blue Heron.** *Ardea herodias* (Linnaeus). Rare.

93. **Black Duck.** *Anas obscura* (Gmelin). Breeds (R.).

95. **Merganser.** *Mergus serrator* (Linnaeus)? Breeds (R.).

96. **Loon.** *Clownus torquatus* (Brünnich). Rare, but in 1870 common (R.). Grebes have been seen in August; species uncertain (R.).
